OBJECTIVE:

Boomi-focused Software Developer with 2+ hands-on experience in Integration, MDH, Flow, and EDI, looking to build efficient, scalable integration solutions that drive business performance.

EDUCATION:

Kakatiya Institute of Technology and Science

Bachelor of Technology in Computer Science

Warangal, India

Aug 2019- May 2023

TECHNICAL SKILLS

Integration & iPaaS: Boomi (Integration, MDH, Flow, EDI), Celigo, Rivery, MuleSoft (Basics)

APIs & Data: REST, SOAP, JSON, XML, SQL, Web APIs, OAuth 2.0.

Languages: Python, C, SQL, Java, Groovy Script, HTML, CSS

Frameworks: Pandas, Numpy

Platforms: Salesforce, BigCommerce, Paycom, NetSuite, NetSuite OpenAir

Cloud: AWS (Lambda, S3, EC2, API Gateway)

Databases: Snowflake, MySQL, PostgreSQL

Tools & Technologies: Postman, Swagger, Git/GitHub, VS Code, XSLT Code

PROFESIONAL SUMMARY:

Boomi Developer, Reskom Pvt Limited | 2 Years 4 Months

Aug 2023 – Nov 2025

- Developed enterprise integrations using Boomi Integration, MDH, Flow, and EDI across Salesforce, NetSuite, Snowflake, Paycom, and NetSuite OpenAir.
- Built POCs on Boomi and Rivery, including data transformations, reference models, centralized Master Data Hub solutions, and automated pipelines for Salesforce–NetSuite–Snowflake integrations.
- Worked on multiple projects, gaining practical experience in development, testing, requirement gathering, attending client meetings, and team collaboration.
- Delivered production support, maintained integrations after go-live, and handled production issues, ensuring high data quality and operational efficiency. Skilled in Web API integrations, EDI mappings, Groovy scripting, XSLT transformations, and implementing scalable, high-impact integration solutions.

Durga Institute

May 2023- Aug 2023

Completed a 3-month Python Programming course, strengthening programming, data handling, and automation skills

PROJECTS

• Developed Flow Interface:

Independently designed and developed a Boomi Flow UI to automate Trading Partner creation using AtomSphere APIs, reducing manual effort by 30% and improving accuracy. This solution enhanced EDI-based project ensured reliable automated data processing.

• Crumdale Boomi Master Data Hub Project | July 2025 – Nov 2025

Implemented MDH models for Employee and Account entities with real-time synchronization. Applied Data Quality rules and created listener processes for event-driven updates.

• Total Resource Management Project | June 2025

Built Resource and Project data models ensuring seamless system integration. Configured end-to-end synchronization and maintained alignment with business data objectives.

• Ramsell EDI Migration | Integration Developer | Mar 2024 – Aug 2024

Migrated legacy BizTalk integrations to Boomi supporting EDI processing. Worked on 850,855,810 EDI Integrations

Independently managed integrations from development to deployment. Improved data accuracy and reduced processing time through SQL-based Queries on Target Database.

• Orion Integration Project | Feb 2025 – Jun 2025

Developed REST API-based integration flows between Darwin and Conscious systems. Coordinated with senior developers and delivered production-ready processes with minimal rework.

• Solo Brands – OMS to Snowflake Integration Project

Developed 11 integrations using Boomi, ensuring scalable and accurate data flow.

Optimized ETL processes with robust error handling, logging, and monitoring. Collaborated with a 4-member team for development, testing, and Go-Live deployment.
